

Building Your Trust in Solar

JinkoSolar Wins the 5th All Quality Matters Award from TÜV Rheinland

April 2, 2019

SHANGHAI, April 2, 2019 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or "Company"), (NYSE code JKS), a reputable solar module manufacturer in the world, today announced it won the 5th All Quality Matters Award for PV Module Energy Yield Simulation (Mono Group) at the Solar Congress 2019 organized by TÜV Rheinland.

TÜV Rheinland's All Quality Matters Award is the most competitive and highly respected industry award for PV modules, inverters, energy storage systems, and components recognized for its objective and credible evaluation process and authoritative neutral selection mechanism. The careful evaluation of energy yield simulation is based on performance testing of samples randomly selected from mass production under global conditions that range from irradiance of 100-1100W/m² and temperatures of 15-75°C. JinkoSolar ranked first in testing conducted for the mono group and was recognized for outstanding energy yield and its high quality standards.

Dr. Jin Hao, Vice President of JinkoSolar commented, "I am pleased to have followed up our win in the poly group last year by winning the energy yield simulation award for the mono group this year. Our R&D team remains dedicated to the development and application of cutting-edge technologies. We continue to accumulate our mono technology and are working to ensure the stable and highly-efficient performance of our modules in PV plant operations."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is one of the world's largest and foremost solar module manufacturers. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions. JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 9.7 GW for silicon wafers, 7.0 GW for solar cells, and 10.8 GW for solar modules, as of December 31, 2018.
