JinkoSolar's Wafer Factory in Sichuan Leshan Is First Wafer Factory to Receive Zero Carbon Factory Certification

11/09/2023

SHANGRAO, China, Nov. 9, 2023 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), one of the largest and most innovative solar module manufacturers in the world, today announced that its wafer factory in Sichuan Leshan has recently passed the "Zero Carbon Factory Evaluation Code" and has been awarded the "Zero Carbon Factory" certification by TÜV Rheinland for its advanced green business practices. This represents a high degree of recognition of the company's social responsibility and environmental awareness, acknowledging JinkoSolar's progress towards a new level of sustainable development, energy saving, emission reduction and environmental protection, as well as providing a role model for the creation of green factories.

The "Zero Carbon Factory Evaluation Code" is the world's first comprehensive and quantifiable zero carbon factory construction standard and evaluation rules, jointly compiled by more than 20 authoritative organizations, including TÜV Rheinland, and leading companies, and formally filed by the Certification and Accreditation Administration of the People's Republic of China ("CNCA"). The six assessment indicators include infrastructure, intelligent information management system for energy and carbon emissions, energy and resource use, products, greenhouse gas reduction implementation and carbon offset implementation.

JinkoSolar passed the zero-carbon factory certification, marking that in the manufacturing process, through technical energy saving, emission reduction and carbon elimination measures, the factory already has a comprehensive zero-carbon emission performance and has formed a perfect zero-carbon factory management system encompassing material selection, equipment selection, process selection, energy management, carbon digitalization platform, and carbon emission reduction technology, and realized the carbon emission data collection-management-optimization triple linkage.
