JinkoSolar to Supply 18.5MWp to Lightsource, the UK's Largest Solar Energy Generator

October 4, 2013

LONDON, Oct. 4, 2013 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), a global leader in the solar PV industry, that it had entered into an agreement before August 6th 2013 with Lightsource Renewable Energy, the UK's largest solar energy generator and asset operator, to supply 18.5MWp photovoltaic modules for solar farm projects in the United Kingdom. Once installed, these projects will generate enough clean electricity to power over 5000 UK households during daylight hours.

"We are pleased to have the opportunity to cooperate with Lightsource on solar farm projects. It is one of our largest wins in the UK and further extends our presence and brand recognition in the local market." commented Mr. Xiande Li, Chairman of JinkoSolar. "We look forward to working closely with Lightsource and share our mutual vision of a green low-carbon future."

Karen Boutonnat, Managing Director for Lightsource Renewable Energy comments, "We are the UK's largest developer and operator of large scale solar farms, and our ever increasing pipeline demands that we ensure our supply chain remains intact. We have targets to be met, and therefore during the early stages of anti-dumping uncertainty we had to work closely with our suppliers to put in place orders that would secure the development of our projects. We are pleased to be working with JinkoSolar to meet the UK's renewable energy targets, and hope this partnership will continue into the future."

Karen elaborates, "The progress of the global green economy has been astonishing recently. The most notable growth so far, has been the UK's demand for solar PV, a home grown energy asset that is cheap and swift to deploy. This means more jobs, more business opportunities and more international investment. It is a very exciting time for solar PV in the UK and deals like this with JinkoSolar will further progress the UK's vision to take energy generation into its own hands."

About JinkoSolar Holding Co., Ltd.

JinkoSolar is a global leader in the solar PV industry with production operations in Jiangxi and Zhejiang Provinces in China and sales and marketing offices in Shanghai and Beijing, China; Munich, Germany; Bologna, Italy; Montpellier, France; Zug, Switzerland; San Francisco, the United States; Queensland, Australia; Ontario, Canada; Singapore; Tokyo, Japan; and Cape Town, South Africa.

JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of approximately 1.5 GW each for silicon ingots and wafers, solar PV cells, and solar PV modules, as of June 30, 2013. JinkoSolar sells electricity in China and distributes its solar products to a diversified customer base in the global PV market, including Germany, Italy, Belgium, Spain, the United States, France, Eastern Europe, China, India, Japan, South Africa, and other countries and regions.
