Mr. Kangping Chen, JinkoSolar's Chief Executive Officer commented, "I am pleased to announce a strong quarter to finish out the year with module shipments hitting 1,733 MW and 6,656 MW in the fourth quarter and full year 2016, respectively. I am proud to say that this puts us firmly in the position as the largest module supplier globally. Total revenues during the quarter hit US\$737.6 million and US\$3.08 billion for the whole year. While market sentiment is gloomy overall, we remain optimistic about the global demand in 2017."

"We successfully complete the spin-off process of Jinko Power's project business which generated US\$145.2 million in investment gain for JinkoSolar and strengthened our balance sheet by cutting debt to US\$892 million from US\$2.1 billion. In January 2017, we further cut our debt by repurchasing almost all of our convertible notes due in 2019 at holders' put option. These initiatives have increased our corporate flexibility and reinforced our financial position which will allow us to take advantage of more opportunities in 2017."

"We further consolidated our leading position across a number of key and emerging markets during the quarter. China remains our largest market where we expect growth momentum to continue during the first half of 2017 as rush orders come in before the FiT cut in June 2017. Demand during the second half of 2017 may soften, but distributed generation and Top Runner projects are expected to make up for the demand. After a sharp decline during the quarter, ASPs in the US have begun to stabilize. While uncertainties remain, we believe that the growth trajectory of the US market won't deviate significantly, especially with ITC still valid. India, with its abundant sunlight and increasing demand for power, has created ideal market conditions for rapid growth. We are very optimistic about our potential in this market and have been rapidly expanding our team there. We will also reinforce our leading position in Latin America and the Middle East, two markets that remain full of opportunities."

"We remain focused on high-efficiency technologies and stringent quality controls. Demand for our PERC products continues to be strong and as a result, we have been adjusting our production capacity to accommodate this market trend since the first half of 2016."

"In conclusion, I am proud of what we have achieved throughout the past quarter and year. We have extensive experience having faced similar market headwinds before, leaving us confident in our strategy and our ability to focus on developing technology, building our brand equity, keeping a lid on costs and improving our financial strength to further drive shareholder value."

The sequential and year-over-year decreases were mainly attributable to a decline in average selling prices of solar modules in the fourth quarter of 2016.

#### Gross Profit and Gross Margin

Gross profit in the fourth quarter of 2016 was RMB730.0 million (US\$105.1 million), compared with RMB1,026.1 million in the third quarter of 2016 and RMB1,129.8 million in the fourth quarter of 2015. The sequential and year-over-year decreases were mainly attributable to a decline in average selling prices of solar modules in the fourth quarter of 2016.

Gross margin was 14.3% in the fourth quarter of 2016 compared with 19.2% in the third quarter of 2016 and 19.0% in the fourth quarter of 2015.

The sequential increase was mainly due to the increase of the shipping cost, and the provision for impairment and disposal of property, plant and equipment, partially offset by the impact of the reversal of warranty expense during the fourth quarter. We made downward adjustments to our accrued warranty expense in the fourth quarter, to reflect the general declining trend of the average selling price of solar modules, which is a primary input into the estimated warranty expense. Based on the updated warranty estimation, we reversed the warranty expense related to prior years and the first nine months of 2016 by RMB92.1 million (US\$13.3 million) and RMB6.0 million (US\$0.9 million) respectively.
