

Building Your Trust in Solar

JinkoSolar Supplies 28 MWdc of Solar PV Modules to Jacumba Solar Project in the US

September 22, 2017

SHANGHAI, Sept. 22, 2017 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), a global leader in the PV industry, today announced that it supplied 28.2 MW dc of its solar PV modules to Swinerton Renewable Energy, for the construction of the Jacumba Solar Project.

Located in San Diego County, California, the Jacumba Solar Project consists of more than 80,000 JinkoSolar 1500 volt monocrystalline PERC modules. The project was energized in early August, seven months after it was acquired by BayWa r.e in late 2016. Swinerton Renewable Energy provided engineering, procurement, and construction (EPC) for the project.

"JinkoSolar has worked tirelessly to build and maintain its reputation as the most reliable module supplier in the utility market," said Nigel Cockcroft, General Manager of JinkoSolar (U.S.) Inc. "Swinerton's decision to select Jinko for a project with an aggressive schedule is a testament to our ability to deliver on-time."

"Our continued partnership with JinkoSolar, a trusted solar provider in our industry, helped us deliver this project on-time and on-budget, providing maximum value to our client, BayWa r.e.," said George Hershman, Senior Vice President and General Manager of Swinerton Renewable Energy. "This value is passed on to the larger U.S. economy, creating jobs and stimulating the local economies in which we work."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial, and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions. JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 6.0 GW for silicon ingots and wafers, 4.5 GW for solar cells, and 7.5 GW for solar modules, as of June 30, 2017.
