JinkoSolar Supplies 55.7MW of Solar Panels for Central and Eastern Africa's Large Solar Plant

December 3, 2018

SHANGHAI, Dec. 3, 2018 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or "Company"), (NYSE: JKS) one of the world's largest solar module manufacturers, recently announced that it supplied 55.7MW of high-efficiency modules to the Garissa Solar Power Plant, which is expected to be one of the largest solar power plants in central and eastern Africa once completed.

Located in Barki Village, Garissa County, Kenya, the solar plant is expected to be formally commissioned by Kenyan President Uhuru Kenyatta. The solar plant is expected to strengthen Kenya's rich solar energy resources, diversify its power generation mix, and reduce energy costs. Once completed, the solar plant will connect to the national grid and offer energy costs that are competitive with other sources.

"JinkoSolar is committed to providing the world with high-quality products to generate green energy," commented Mr. Gener Miao, Vice President Global Sales and Marketing of JinkoSolar. "Garissa County has favorable sunlight conditions for solar power generation. The completion of this project is expected to open up Garissa County, creating an economic hub in northeast Kenya that will generate economic development and boost local businesses. It is also another step towards President Kenyatta's 2020 target of obtaining 100% green energy across the country."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is one of the world's largest and foremost solar module manufacturers. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions.
